Experience

Full Stack Developer, Flyhigh Talent – San Jose, CA Feb 2024 – Present

- **Led development** of a cross-platform appointment and content delivery system for a drama game franchise (Next528), using **React, TypeScript, and Next.js**, delivering a seamless experience across **Web, iOS, Android, and WeChat Mini Program**. Boosted online appointment efficiency and user engagement, contributing to a measurable increase in customer retention.
- **Architected and implemented** a serverless backend with Firebase (**Firestore, Auth, Cloud Functions, Storage, Realtime DB**) to support user management, access control, and dynamic content distribution. Enabled scalable operations with minimal maintenance overhead, reducing backend costs and deployment complexity.
- Applied **Next.js SSR and ISR** to enhance **SEO and page performance**, significantly reducing page load time and bounce rates. Improved content visibility and user acquisition through organic search traffic.
- For the **Securra Health** platform, developed Android BLE communication in **Kotlin**, supporting simultaneous connections with custom medical devices for weight, temperature, and blood pressure monitoring. Achieved stable data sync under 3s latency with 95% connection success rate during field testing.
- Designed and developed a **real-time health data dashboard** in **React Native** using **SVG visualizations**, integrating data from both **Apple Health** (via HealthKit) and **Android Platform Controller** to provide cross-platform biometric trend analysis and intuitive visual feedback for users and caregivers.

Full Stack Developer Intern, Airclub Software – San Francisco, CA Sep 2023 – Feb 2024

- Contributed to the launch of a **cross-gym membership platform**, enabling users to access and book classes across multiple partner gyms through a centralized mobile-friendly portal. Built a front-end/back-end separated architecture with JWT-secured access and modular API design. Supported onboarding of 10+ gyms within two months, streamlining booking for over 500 users.
- Worked closely with the **UI/UX design team using Figma**, translating wireframes into responsive, mobile-first interfaces to ensure seamless usability on all screen sizes.

Education

Georgia Institute of Technology, Master of Computer Science Present

- **Coursework:** Graduate Algorithms, Machine Learning, Interactive Intelligence

University of California - Santa Barbara, Master of Technology Management 2022 – 2023

- **Coursework:** Data science, Agile software development, Technology-based operations, Finance

University of Eötvös Loránd, BS in Computer Science 2018– 2022

- **Coursework:** Programming, Algorithms, Compilers, Databases, Machine learning, Distributed Systems

Projects

Immigration Law Practices with AI-Driven Solutions for Law Firms AILaw

- Translated UI/UX mockups into responsive Vue 2.0 components and automated government scheduling updates via a Python-based web scraper, enhancing data freshness and reducing manual maintenance by 90%.

ESG Ratings report Mingshan Think Tank

- Collaborated with university professors to integrate advanced ESG analysis algorithms using C#, .NET Core, and the Entity Framework (EF) Core ORM framework, providing customized ESG ratings for businesses.

Technologies

Programming Languages: JavaScript, TypeScript, JAVA, Kotlin, HTML/CSS, Python, C#, C/C++

VF Frameworks and Libraries: React, React Native, Node.js, Firebase, Jest, GraphQL, Vue, Spring Framework

Tools and Platforms: Yarn, Figma, Tailwind CSS, Docker, WeChat DevTools, CI/CD, MongoDB, Git, SaaS
